

Redefining value in the age of AI: managerial & social perspectives

Blended Intensive Program - 4 ECTS

In Valenciennes, France : February 2 - 6, 2027

Online - January, 11 and 15

Erasmus+

Université Polytechnique HAUTS-DE-FRANCE

Description

This program is dedicated to solving a real problem: how AI is changing the value of our lives and work.
Participants will work on a challenge in small multicultural teams.

Learning outcomes

Participants will learn to conduct research, design active experiential methods to explore and define the problem, find and test solutions.

Program

The program includes:

- Classes
- Design thinking workshops
- Team work
- Extracurricular activities led by UPHF students

Prerequisites

Students should be actively enrolled in one of the partners universities involved in the program, and have a minimun English level equivalent to B2.

Partners

The program is organized by Université Polytechnique Hauts-de-France, in Valenciennes (France) with the collaboration of University of Cagliari (Italy), Hochschule Worms (Germany), Babeş-Bolyai University (Romania), partners in the IBSEN Network.

Practical Information

Participation in the program is free of charge.

Students' travel and subsistence costs are supported by their home universities (from Erasmus+ funds).

UPHF will provide guidance for travel and accomodation.
Extracurricular activities and some meals will be covered by UPHF with the support of Erasmus+ program BIP.

Registration

Interested students should contact their home university Erasmus+ coordinator.
