Oxford WordSmith Tools 4.0

WordSmith 4.0 was current from 2004 to 2007.

Free Registration

Name: FREE
Other Details: WS4 licence
Registration: XA00.3844.3153.3460.3789

Download from: http://www.lexically.net/wordsmith
/downloads/ and make sure you choose Version 4.0.

When "Updating from Demo", please PASTE these details in
EXACTLY as you see them here.
Please see "readme.txt" for any further details.

FAQs, re-installation

Once you have WordSmith 4 up & running, you can update
automatically by choosing File | Web Version Check in the main
menu. This will check the version of each file you have against the
same table (at www.lexically.net/downloads/version4
/wordsmith_versions.htm) and will know what needs to be updated.

Installation and Running WordSmith 4

If you downloaded the self-extracting .exe file e.g. to c:\temp, just
run it: it will help you expand the contents into c:\wsmith4 or
wherever you choose. All the files must be put in the same folder.
The one suggested is c:\wsmith4 but this entirely up to you.
To install, all you need do is be sure you have all the files in the
same folder. (Of course you can put your wordlists and
concordances wherever you like, eg. in sub-folders of \wsmith4 or
on quite different drives; you only need ensure all the program files
-- the ones you downloaded -- are in the same place.)

To start using WordSmith 4, run \wsmith4\wordsmith.exe. You will be
asked to agree to Terms & Conditions then will be taken to an

updating window (\wsmith4\updater.exe) which will allow you to type
in a registration code if you have purchased one. It'll also allow you
to put an icon on your desktop.

If you have never used WordSmith, you may find it best to choose
Help | Contents | Getting Started, or | Overview in the menu.
