Listening comprehension exercises...

What is Brexit?

[http://www.bbc.co.uk/learningenglish/
english/features/news-report/ep-160628](http://www.bbc.co.uk/learningenglish/english/features/news-report/ep-160628)

Step 1: Listen

You're going to hear a genuine BBC news report from 28 June, 2016. Before you listen, read these three summaries:

1. European leaders will be discussing Britain's future relationship with the EU in meetings with the British prime minister.
2. European leaders will not be discussing Britain's future relationship with the EU in meetings with the British prime minister.
3. European leaders will be starting the process of Britain leaving the EU in meetings with the British prime minister.

Step 2: Learn the key words and listen again

How was that? Try listening again. Here are three definitions of key vocabulary items which may help you.

- **face**
(here) deal with
- **triggers**
starts a process
- **mechanism**
(here) way of doing something; process

Step 3: Transcript and answer

- The British Prime Minister David Cameron will **face** European leaders at an emergency meeting in Brussels shortly for the first time since Britain voted to leave the EU.
- The leaders of Germany, France and Italy have said there will be no talks on Britain's future relationship with the EU until the government in London **triggers** the formal legal **mechanism** to leave.

Italy has a diversified industrial economy, which is divided into a developed industrial north, dominated by private companies, and a less-developed, highly subsidized, agricultural south, where unemployment is high. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family-owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 17% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy is the third-largest economy in the euro-zone, but its exceptionally high public debt and structural impediments to growth have rendered it vulnerable to scrutiny by financial markets. Public debt has increased steadily since 2007, topping 126% of GDP in 2012, and investor concerns about the broader euro-zone crisis at times have caused borrowing costs on sovereign government debt to rise to euro-era records.

Global English – English as a Lingua Franca (ELF)

The language of non-native speakers will soon become the language of international communication

WHAT ARE THE CONSEQUENCES OF THIS?

- Vocabulary
- Pronunciation
- Grammar

The English we teach and learn will change.

Certain pronunciations and errors will be accepted...

WE MUST BE MORE TOLERANT AND ACCEPT DIVERSITY

Global English- English as a Lingua Franca (ELF)

- Why do people want to know English?
- WORK
- LEISURE AND HOLIDAYS
- STUDY (school, university, life long learning)
- INTERNET
- PERSONAL INTERESTS
- and contribute to the definition of our identity:
- I AM AN ENGLISH SPEAKER

Global English - English as a Lingua Franca (ELF)

- What's English for?
- Intercultural communication
- Professional necessity
- Driver of international capitalism
- A threat for local cultures and languages????

Why is English our Global Language?

- It has been the dominant language of science for a long time
- It has been the language of powerful nations for many centuries
- As the consequence of its global spread, English came to be adopted as an additional language, it began to adapt to the local needs (addition of local vocabulary)
- This is why English has probably a larger vocabulary than any other language (over 1 m)

GLOBAL ENGLISH

Many people believe that English has a simple structure and a very simple morphology. Because of this, it has become a Global Language. Do you agree??

A LANGUAGE BECOMES AN INTERNATIONAL AND GLOBAL LANGUAGE ONLY FOR ONE REASON:

The power of the people who speak it

A combination of political/military, scientific/technological, economic, and cultural power has led to English achieving its present dominant position
(Crystal, 2009)
