**European Digital UniverCity**

EDU CARDS

## What is the ESC - European Student Card?
The ESC is not a new card, it's just your regular student card, but **upgraded with a European scope!**

The six partners of EDUC Alliance – European Digital UniverCity – create a truly integrated European University with students, researchers, and administrative staff who learn, impart and work at universities of Cagliari, Masaryk, Paris-Nanterre, Pécs, Potsdam and Rennes 1.

These EDUC Alliance universities created to implement the ESC together, so you, as a student can benefit from many advantages of the European Student Card among EDUC alliance but also accross the rest of Europe during your mobility.

Principle: anywhere in Europe, your student status will be recognized

• A common graphic identity thanks to a European hologram on the student card, which allows a quick visual check
• A European Student Identifier (ESI) which identifies the student through all the applications and services developed, thanks to a European digital platform
• A QR code that certifies your "student status" and its validity via a smartphone or a simple QR code reader.

The purpose of the student card has always been to allow identification of student status. In recent years, most student cards have evolved becoming multi-service cards. Now, through the ESC not only student status and identity are recognized everywhere in Europe, but it can also allow you to get easy access to services without the need to register for a new card during your mobility.
After an experimental phase and as a 1st step, the card will allow you to register at any library and enjoy the services provided (book borrowing, online resources, WIFI, printing, etc.) in all the campuses of the EDUC Alliance.

Cagliari University

As UNICA does not have a physical card, students access the service after being registered and through their Fiscal Code. The university registers on the European platform and then records its students. Each student card has been provided with a ESCN printed as a QR code.

To access the S.B.A (The University Library System) students need to book a reservation (except for loaning), visiting the relative Library website:
https://www.unica.it/unica/it/sba_biblioteche.page

The libraries services are loan (find the textbooks of your courses), interlibrary loan, document delivery, ask a librarian, libraries catalogue, notebook loan, reading rooms.
