International Summer School

Sharing space with tourists and tourism

Sustainability of tourism development from the resident perspective

Organised in **Cagliari (05th-10th May 2025)**, this International Summer School is open to **Bachelor's, Master's and PhD students** in the following disciplines: urban and regional planning, transport planning, energy planning, sustainable urban planning sustainable tourism, landscape planning, and other related fields.

Applications deadline is 15th February 2025.

The Sea & Cities International Summer School offers BA/MA students and PhD candidates an opportunity to engage with the emerging challenges of planning and regenerating coastal cities. The program focuses on the intersection of urban and transport planning, considering the environmental and social threats these areas face. It takes an interdisciplinary approach to the multiple transitions affecting coastal cities, including demographic, ecological, energy, and digital shifts.

The program includes lectures, teacher-student interactions, laboratory activities, seminars, and field trips in the city of Cagliari, Sardinia. Local authorities and experts will contribute to discussions, offering insights into urban transformation processes, the relationship between city ports and surrounding regions, and the integration of sustainable tourism.
